Dear Commissioner Henney,

I would like to urge you to save human lives by banning the use of medically useful antibiotic in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics.

This, in time, is going to leave physicians with no way to treat life-threatening bacterial infections in humans.

I am a woman living with breast cancer and my husband had open heart surgery last summer. I know first hand how important antibiotics can be.

Please ban their use in animal feed.

Sincerely,

A handwritten signature in cursive script that reads "Shiela Cockshott".

Shiela Cockshott
